Roofs designed to last a lifetime

LONG LASTING | EASY TO FIT
Never replace your shed roof again!

Roofs Designed to Last a Lifetime!

EPDM roofing membranes have been around for decades and have been installed worldwide. Over the last 20 years EPDM has become the fastest growing residential flat roof system in the UK. From this heritage the SKYGUARD™ brand was born specifically for the garden building market.

No More Leaks!

The SKYGUARD™ EPDM roof system will protect your log cabins, garden studios, summer houses and humble garden sheds for their entire life. Unlike traditional roofing materials the EPDM membrane is completely UV stable and will not tear or blister. The membrane is fully bonded to your roof deck and remains flexible for life.

Get Watertight Faster!

Whether you are fitting the roof yourself, have your own installation team and need to get watertight quickly or you are supplying the DIY trade and aftermarket, the SKYGUARD™ roof system will give you the extra peace of mind you deserve.
